Joshua Edwin Rene Bonham

jb.brubusiness3@gmail.com | LinkedIn | Portfolio | GitHub

PROFESSIONAL SUMMARY

Software engineer specialising in machine learning and GenAI, with full-stack Python, TypeScript, React and SQL experience. Shipped live LLM-powered features, built evaluation pipelines and analysed data, backed by a 3.95 CGPA and leadership roles.

EDUCATION

Bachelor of Software Engineering (Hons) — **Subang Jaya, Malaysia**
Sunway University & Lancaster University — *September 2023 – August 2026*
CGPA: 3.95 | 6× Dean's List Award | Jeffrey Cheah Entrance Scholarship

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional — **Remote**
Oracle University — *August 2025*

EXPERIENCE

Data Scientist Intern — **Kuala Lumpur, Malaysia**
Touch 'n Go Digital Sdn Bhd | Website — *January 2026 – April 2026*

- Built AI workflows that automated commercial newsletters and generated weekly TPV and revenue performance snapshots for 30+ stakeholders including the CEO, CFO and CCO, saving 7+ hours per week.
- Performed exploratory data analysis and feature engineering on merchant data using MaxCompute SQL for business insights.

Junior Software Engineer & Management Trainee — **Remote**
Plandora (TBA.LABS PTE. LTD.) | Website — *October 2025 – January 2026*

- Built and optimised full-stack features with React.js, REST APIs, and CI/CD pipelines, enhancing stability and AI functionality.
- Engineered an LLM-as-a-judge pipeline with LangSmith and DeepEval to benchmark AI chat outputs and token limits.
- Delivered UI/UX enhancements and implemented llms.txt files to strengthen the trip planner's AI-driven discoverability.

Part-Time Coding Tutor — **Remote**
Build A Genius | Website — *June 2026 – Present*

- Teach Scratch, Minecraft Education and Python, including introductory ML and game development, to 14 children 1:1.
- Explain programming concepts clearly to young learners, debug student code live and adapt pacing to mixed abilities.

PROJECTS

Machine Learning Fraud Detection System — **Personal Project**
Payments Fraud Detection | GitHub Repo — *October 2026*

- Built a leakage-safe LightGBM fraud detection pipeline on 590K card transactions, reaching 0.59 held-out PR-AUC (3.5% fraud).
- Explained predictions with SHAP, set a cost-based decision threshold and deployed a Dockerised FastAPI service with 50 tests.

AI-Powered Inclusive Employment Platform — **Capstone Project**
Inklusif | Live Demo | GitHub Repo — *September 2025 – August 2026*

- Built an accessible employment ecosystem for Persons with Disabilities in Malaysia using Next.js 15/Supabase/FastAPI.
- Integrated Google Gemini for AI resume parsing, offer letter generation, job matching, and platform-wide translations.
- Delivered a real-time text, voice and video messaging system, supporting multiple languages for multi-stakeholder accessibility.

OCR Budget Tracker — **Personal Project**
Budget-Tracker App | Live Demo | GitHub Repo — *April 2025 – September 2025*

- Designed React frontend with AI-powered OCR for receipt parsing, reducing manual data entry by 80%.
- Implemented FastAPI/MongoDB/Python backend in Docker containers with Firebase Auth and CSRF protection.

Gamified Finance App — **Hackathon**
ImagineHack 2024: PengYou | Live Demo | GitHub Repo — *June 2024*

- Led the pitch and built a virtual-pet reward app using MongoDB, Svelte and Google Gemini to improve financial habits.
- Awarded 1st Runner-Up and Best Pitch.

LEADERSHIP

Executive of Education Department — **Selangor, Malaysia**
Sunway Tech Club, Sunway University — *June 2025 – April 2026*

- Coordinated a 5-week GenAI Study Jam for 900+ participants and co-led a portfolio workshop featuring a speaker from Google.

SKILLS

ML & Data: Python | scikit-learn | LightGBM | SHAP | NumPy | pandas | SQL | EDA | Feature Engineering | Optuna | Matplotlib
GenAI & LLMs: Google Gemini API | LLM-as-a-judge Evaluation | LangSmith | DeepEval | Prompt Engineering | OCI GenAI
Backend: FastAPI | REST APIs | MongoDB | Supabase | Java | Scala | Oracle SQL | MaxCompute
Frontend: TypeScript | JavaScript | React | Next.js | Tailwind CSS | HTML/CSS
Tools & Platforms: Git | Docker | CI/CD Pipelines | pytest | Firebase | Figma | Oracle Cloud | Agile | VS Code
Languages: English (Native) | French (Fluent) | Afrikaans (Conversational)
